LEVEL III

VISITING PROFESSORSHIP PROGRAMME COLOMBIA HEAD AND NECK RADIOLOGY

August 1, 2017
Bogotá/Colombia

Course information

This course is aimed at senior residents, board-certified radiologists and fellows interested in head and neck imaging and is designed as an intense one-day programme covering key topics in head and neck pathologies. It is intended to offer practical insights into head and neck challenging problems encountered in the every-day practice, as in lesions of the orbit, larynx, temporal bone and neck. A special attention will be given to the latest development in CT and MR to optimise the detection, characterisation, local and regional tumour mapping and follow-up of head and neck neoplasms. The course will also provide an overview of the potential of high-resolution Cone Beam Computed Tomography for low-dose imaging of temporal bone and sinuses. Renowned European lecturers will ensure a high-quality teaching programme, combining lectures and workshops, allowing case-based interactive panel discussions in small groups.

Learning objectives

- to learn about the impact of imaging information on treatment choices
- to understand the indications, limitations and comparative values of US, CT and MR techniques in a wide range of head and neck pathologies
- to review imaging protocols and key information in the assessment of neck lumps and spread of deep infections
- to discuss the state of the art of CBCT in lesions of temporal bone and sinuses

Programme

HEAD AND NECK RADIOLOGY

August 1, 2017
Bogotá/Colombia

Tuesday, August 1, 2017

07:30–08:15	Registration
08:15–08:30	Welcome and introduction
08:30–09:10	Imaging of sinusal lesions R. Maroldi, Brescia/IT
09:10–09:50	Common pathology of the temporal bone J.W. Casselman, Bruges/BE
09:50–10:30	Imaging of orbital pathologies B. Schuknecht, Zurich/CH
10:30–10:50	Coffee break
10:50–12:30	Workshops (R. Maroldi, J.W. Casselman, B. Schuknecht)
12:30–14:00	Lunch break
14:00–14:40	Neck spaces: anatomy and pathology J.W. Casselman, Bruges/BE
14:40–15:20	Imaging of the larynx R. Maroldi, Brescia/IT
15:20–16:00	Lumps and bumps in the neck B. Schuknecht, Zurich/CH
16:00–16:20	Coffee break
16:20–18:00	Workshops (J.W. Casselman, R. Maroldi, B. Schuknecht)
18:00	Certificate of attendance

Host Organiser

S. Bermúdez
Bogotá/CO

Venue

ESR Learning Centre Latinoamerica
Cra. 19a No 90-13, Of. 304
Bogotá
Colombia

Registration fee

USD 83
(until May 15, 2017)
USD 100
(after May 15, 2017)

*VAT (16%) not included.

LEVEL III

Learning Objectives

HEAD AND NECK RADIOLOGY

August 1, 2017
Bogotá/Colombia

August 3, 2017
Cartagena/Colombia

Imaging of sinusal lesions

R. Maroldi, Brescia/IT

- to understand the anatomy and functional arrangement of the drainage pathway of the paranasal sinuses
- to learn about the indications for CT-CBCT imaging and key information in chronic rhinosinusitis
- to learn the imaging features of aggressive sinonasal inflammatory diseases

Common pathology of the temporal bone

J.W. Casselman, Bruges/BE

- to know the basic CT and MR anatomy of the temporal bone
- to be familiar with the most frequent indications for temporal bone imaging
- to know which state-of-the-art imaging techniques are used for which pathologies

Imaging of orbital pathologies

B. Schuknecht, Zurich/CH

- to know the relevant anatomy of the globe and orbit
- to know the most common pathologies affecting the orbit
- to know common pathologies arising from the vicinity affecting vision and oculomotor function
- to tailor the examination technique to specific disease entities

Neck spaces: anatomy and pathology

J.W. Casselman, Bruges/BE

- to learn to distinguish the different neck spaces
- to know which lesions can occur in which spaces (differential diagnosis)
- to be aware of the connections between spaces and the potential escape routes of the lesions

Imaging of the larynx

R. Maroldi, Brescia/IT

- to understand the key structures of the larynx that drive the treatment choice
- to learn about the latest technical developments to analyse the neoplasms of the larynx
- to review the expected imaging changes after surgery and (chemo)radiation therapy

Lumps and bumps in the neck

B. Schuknecht, Zurich/CH

- to learn to categorise common pathologies in the head and neck based compartmental approach
- to learn to assess head and neck pathologies by supplementary DWI and perfusion imaging
- to learn to identify and categorise congenital lesions of the neck
- to learn to tailor the examination techniques to specific pathologies

*Education in
partnership*

Please note that programmes are marked with a logo to indicate their classification according to the European Training Curriculum.

LEVEL I First three years of training

LEVEL II Fourth and fifth year of training
(general radiologist standard)

LEVEL III Subspecialty training standard

ESOR stands for education in partnership.

This Visiting Professorship Programme is implemented with great support and partnership of ACR (Asociación Colombiana de Radiología).
